

## The Ice Age video, 1 pg

<https://www.youtube.com/watch?v=6ekejmqKfNI>

I have included this 1½ hour presentation to supplement the ID series. There are several others in this series, but the shorter one I wanted is no longer listed on YouTube. *I suggest watching it in half hour segments.*

Michael J. Oard explores **the evidence for only one Ice Age caused by the global Flood just a few thousand years ago**. He also looks at the associated mysteries of the Ice Age. Since the 1700's we've been told that there have been many ice ages over millions of years, but now meteorologist Michael Oard shares evidence the main-line scientific community won't tell you. He shares compelling evidence for only one Ice Age not long after the end of the global Flood as recorded in the Bible. He shows **how the Flood produced the right conditions to develop the Ice Age in 500-700 years, then how a catastrophic melt off transpired in only 50-70 years**. He also shares **why only one Ice Age explains many associated mysteries** such as the extension of the woolly mammoth and other mammals, massive permanent climate change, and the spread of man and animals after the Flood. He shows how the Biblical record makes much more sense of what we find in the geologic record.
