

10 Fascinating **Symbiotic Relationships Between Animals**, 1 pg

<https://www.youtube.com/watch?v=5k7d9UTc6sM>

I have included this **short presentation to supplement the ID series**. There several categories for the different types of relationships between various dissimilar organisms. This one describes those **mutually beneficial to both animals**. Other interesting categories involve **symbiotic relationships between animals and humans and wild animals seeking help from humans**. There are a bunch of these types of stories on YouTube, but no way to ascertain their validity.

Symbiotic relationships are often encountered in nature. Sometimes we can observe them with a naked eye, for instance the absolute interdependence between bees and flowering plants. However, sometimes we need special equipment, such as a microscope to observe a symbiosis.
